dream Up

dreamUp

DreamUp is a not-for-profit initiative that provides students an orchestrated method of raising funds to finance their space projects.

DreamUp can also connect students with industry experts who can help them design their project, or provide them some open-source resources.

The Benefits of Undertaking an ISS Project for Students and Teachers

- Chance to make some discoveries
- Prepares students for more projects in the space industry
- A memorable experience
- The high excitement level associated with this type of project!

- NanoRacks has flown over 150 unique student-designed payloads, with a student payload pipeline three years out
- We recognize how hard payload design for space is!
 - Must allow for launch delays, occasional loss of power, varied temperatures, and only use approved materials
- Students come up with incredibly creative designs to meet NanoRacks and NASA standards
- DreamUp makes fundraising EASIER
